

If you are looking to renovate an existing lobby or design a new building, plan on integrating the new DirectSUITE™ Digital Directory System into your building. Network enabled and powered by A.R.T.'s DirectTENANT™ software, our solution allows for easily updated names, logos and scrolling text on high resolution LCD displays. Internet news and live TV can also be integrated to accomplish an information center and important attraction for the 21st century lobby.

System Components

Hardware

All components are standardized and run on Windows® based systems. Our experts recommend the best combination of display devices to render optimum directory listings, audio and video in screen sizes from 15" to 46" (per screen) Choose from multimedia server options or "Direct Connect" network enabled LCD screens.

network access to the LCD display. A.R.T.'s in house network experts interface with client IT managers for a safe and secure installation. Once the primary template is created, name/tenant changes are easy to complete and immediate.

Software & Interface

A.R.T.'s popular DirectTENANT™ software allows directory listings to be changed instantly and either exported as a high-resolution still image or managed via direct

Housings

Enclosures and built-in cabinets are easy to configure. Our staff is trained to assist designers and architects in the early phases to prepare everything on site for a seamless installation. Many finish options are available. Since all of our units are custom made to order, they can be made to suit any location or application.

Custom Enclosures

The LCD units can be built into existing walls replacing unsightly strip directories, can be mounted to the face of a wall or integrated into lobby guard desks.

Cases are available in stainless steel, any type of wood finish, glass or brass finishes. The enclosure is only limited by the imagination of the designer. With close to three decades of

experience our design staff can help to facilitate a solution to house the components and work closely with building IT managers, facilities engineers and management to accomplish a seamless installation into any building.

A.R.T also specializes in outdoor environmental enclosures for all displays.

Software

The DirectTENANT™ software is designed for ease of use. Information entry windows and templates make the task of changing tenant names and information effortless for building management staff and administrators. No more waiting for strips! Changes are immediate and correct.
